VISION

A MORE WALKABLE WEST CAPITOL HILL

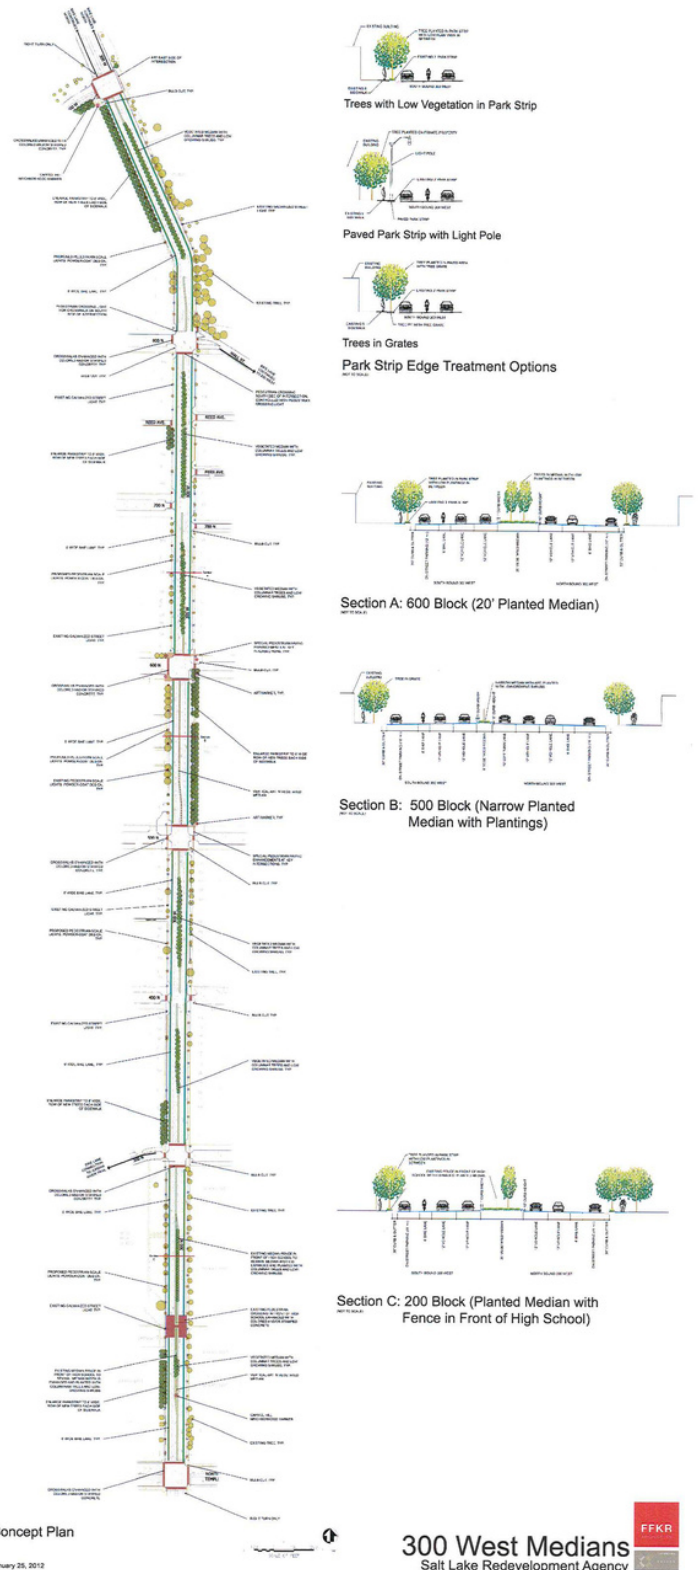

Originally planned and designed as a single phase, the 300 West Streetscape project has since been broken out into two construction phases. The Phase I construction was completed in 2014 and included the installation of landscaped median islands and pedestrian safety enhancements at multiple intersections, including curb extensions to shorten crossing distances, ADA ramps, and new signal push button poles with marked crosswalks.

Phase II will further these efforts with added curb extensions at seven intersections and one crossing near West High School, pedestrian crossing signals at 400 North and Reed Avenue, and a new park strip and other landscaping improvements to the north near Warm Springs Park. The project will also include UTA-planned bus stop relocations and improvements that will greatly increase comfort and ADA accessibility for transit users.
